KEY FEATURES

See the weather as it happens with near real-time updates on quickly changing wind, temperature, and rain data.

Frequency-hopping, spread spectrum radio provides transmission distance up to 1,000ft/300m and superior reception.

Durable design passes a minimum of 10 tests before shipping, including rigorous calibrations and material endurance.

Flexible communication options to send data effortlessly to the console via the wireless solar-powered transmitter or a cabled station.

Easily incorporate additional Davis sensors to create a custom network of sensors tailored to your specific needs.

The smart way to view and stream live weather data

The WeatherLink Console revolutionizes the way you access, analyze, and understand your hyperlocal weather data reported by your Vantage Pro2 or Vantage Vue® sensor suite, or your custom network of multiple Davis sensors. One intuitive device lets you receive and display data from your local network and connect to Wi-Fi to push your data to the WeatherLink Cloud.

Monitor your environment

Configure a custom network of over 80 sensors on 8 transmitters so you can see data from sensors in the garden, by the pool, out in the garage, and down in the wine cellar – all with one WeatherLink Console.

Data viewing with WeatherLink® Cloud

Access your data on Weatherlink.com and App from any connected device via the WeatherLink Cloud. Leverage the WeatherLink API to easily integrate weather and sensor data into your own innovative applications.

TRY THE MOBILIZE APP

With the Davis Mobilize App you can quickly browse sensor data, create custom reports, set and receive alerts, and share information with others.
